Problem 5 A construction worker committed sexual assaults

Problem 6 Laptops, iPads, Phones, surveillance cameras hacking

My questions

An Overall Story

I am a landlord in a blindspot in South Korea. I am in my late forties. I've been experiencing extreme difficulties especially last 15 years. Those were invisible difficulties. I have been wanting to solve those problems. I've got IT certificates and taking cybersecurity courses in university and getting Data analysis certificates and hopes to find some wisdom in my situation.

2002 I was 24. After graduating an Art College in South Korea, I went NYC to take a course at Columbia University.

I met a guy and worked as a web developer and dreamed an happy life. We got married at a court right before she introduced him to her family in South Korea promising have a wedding after. But right after we got back to NYC after I introduced him as a husband to my family, everything went wrong.

In 2008, we broke up and I came back to South Korea. She was emotionally shaken and her body wasn't very healthy.

But I have a positive personality and enjoy learning things and always had hopes. I am just a simple ordinary hard worker.

Around 2010, I was tortured by some electric shocks for a week remotely. That was inflicting intense pain. I couldn't express my situation because the source of the attack was invisible. Since then the harassments became both psychological and physical.

Then I was hired by an Italian cruise company and went North Europe, and when I got back, 2011 November 27, my father passed away by a car accident when he was walking at right next city in a remote area where there is no side walk.

I have lived my mother since managing a couple of small old houses. Her two younger brothers have lived other cities. Four of us inherited two houses together.

Problem 1 Ex

Since 2008 when I broke up with my husband, I asked to finalize the divorce. He said he would but he didn't.

He called me 2024 showed a picture of his three kids and still suggested that we get back together. As always, he wouldn't hang up the phone and made me pay all the international phone bills for an hour and promised me he will get back to her after finalize her divorce.

Problem 2 Mother

After my father passed away, I found out my mother wasn't the person I thought any more. My mother expects me to break down so I do whatever she says me to do. She seems that I go through difficult times to make me. She gave me hard times ruining what I did for the houses and accused me of doing something wrong to her, trying to get me into fights with her especially holidays right before my younger brothers and sister in law come. I tried to do my best to give only positive and good things for my brothers and sister that I love so much.

My mother was my favorite person in the world but she has made her very confused. Then I remembered strange things about her that I didn't think matter.

Problem 3 Health

A dental operation went wrong so I couldn't get out of the bed easily a month. I talked to the doctor something is wrong and the doctor didn't look at me directly and said everything is fine and he even didn't try to take an X-ray that are so common every dentists around conner in South Korea. I went to an other dentist and they said I should go to a bigger hospital like university hospitals because a teeth planted on a wrong place that could go seriously wrong. Eventually got 10 implants and three more waiting during 5 years.

Also a treatment I got for my gum that the doctor with government health insurance made my left forehead dark and eventually whole face.

In 2021, I was treated with cancer treatments for non cancer but malignant masses in my uterus for 6 months. Because of the side effects I couldn't stand up too long.

In 2024, I am getting back to normal.

Problem 4 a 700 square feet old 4 storages house and a 400 square feet 2 storage house and the Tenants of 7 places.

2012 apartment #202 insisted their deposit was 15000000 Won (about \$10000) instead of 10000000 Won (about \$6800). Didn't paid rent more then half of the year since my father passed way.

One of tenants shoved cloth and water tissues inside a toilet and the pipe is clogged so one of the toilets overflowed repeatedly more than 30 times every time I fixed that with chemicals for over three weeks. In the disordered moment a board of the city development called.

Eventually had to make bypass so no matter what they shove in it could be okay. But I couldn't found who that is among 6 Families including my family.

2023 a guy came to contact apt #1 and next morning he asked me re-write the contract and suddenly started repeating the words following:

The person whose name's Kim, In Kwan is filming you right this moment, doesn't he? You are repeating what he ask you to say, right? He is a murderer who raped and killed his mother.

I recorded what he said and called the police but he won't answer the phone and officers couldn't do anything. I went to police station same day and texted him that I was in the police station and the detectives would tell you that there was no person what he said around me. And I texted him that I would re-write the contract for him.

Then, he started text me back and stated talk to me what he want.

I asked him, why did he mentioned repeatedly about the murderer who I never heard of.
He promised me he would never do that again.

I asked him again, why did he mentioned repeatedly about the mother r***ing murderer who I never heard of.

He said he want to cancel the contract and didn't want me to call him again.

The next day, I went to the police station and texted him again to return the money he deposited, about \$200. He didn't answer.

I asked detectives to do something but they couldn't do anything.

And a few months later he sued me for fraud. A detective called me to investigate and decided I was innocent.

And the guy moved to the Incheon city that 4 hours away from this city, where I live and sued me for the money saying other nonsenses.

2022 Broken pipe and fabricate broken ceiling

2023 a guy came to contact apt #201. The real estate agent a couple of blocks away said he was a nice single man. His mother followed him around and wanted see him over and checked the place.

His mother wanted changed the place's door lock for his place and I said no.

Right after he moved in, I found out his mother and two dogs were moved in too.

He said he want to change an window frame I said we will think about it and he shouldn't do that without the landlord, my consent. He acted lunatic and yelled like crazy person and called a contractor and changed without letting the me know.

A few weeks later, he called me the water heater was broken. Turns out that he closed the gas valve. I went to check. He yelled, raged and act violently with his mother. He and his mother stood in front of me closing door with their bodies and won't let me go out. I pushed him trying to get out and said why he was preventing me to go out. A few second later his mother said, let me get out. and he stepped something hurt his foot and I got out. I was recording the thermostat with my iPad and happened to film all this. But police officer couldn't do anything.

Right after that he sent me texts that the sink clog were broken and I had to fix that.

There were so many incidents. I will create database.

Problem 5 A construction worker committed sexual assaults

A construction worker who married with two children acted weird so I said stop doing that clearly several times. The last time, I felt I was close to danger so called a police consultant and woman's sexual harassment report center. They couldn't do anything. I talked to my family they strongly against suing him and said just don't let him work anymore.

After that, my mother said several times he was very good at fixing the houses though. I don't know what's with her. Somehow she was related or caused my sexual assault experiences since when I was four.

Problem 6 Laptops, iPads, Phones, surveillance cameras hacking

1 I visited the cyber police department and called the apple store they couldn't do anything. I managed to save most documents. Some of them destroyed but I had pdf files and documents so I could reconstruct them.

All documents are duplicated even 7-8 times and jumbled. It was very difficult to create even a simple document or pull out the documents I use in everyday life.

I lost the dental insurance who could help me pay bills and investigate thoroughly about the dental issue while I deal with so many problems at the same time.

2 A legal consult website she was contacting suddenly unable to log in. Emails she was waiting I found in the trash can.

3 My refrigerators, laundry machine and dryer, water purifier, dish washer, rice cooker, lights in the rooms all started make noise at the same time. my bidet worked funny. I bought most affordable ones and I found that they weren't smart electronics but still get hacked. They probably manipulated electricity power.

My questions

What I want to know is why these happened?

Who did that?

What could we do to prevent that?

Does this will help other victims out there?

These experiences drained a lot of life, energy and money out of me. What can I do for that?

I found it is really difficult to describe what I've experienced to the officers, detectives, and lawyers. Especially my body was experiencing physical damages for a long time.

Recently a young woman died after she was beaten by her boyfriend. She called and reported to the police more than 12 times for a year. No one could help her. What could we do to systematically fix these problems?

Tenants and plumbers ensemble cases.
