무고죄
calumny; libel; a false accusation[charge].

- He is guilty of calumny.
- He should be charged with making a false accusation.

When I was a young woman, I believed in our neighbors because they are innocent and hardworking nice people. I had a lot of hopes for our community.

And some point, I started to experience so many crimes. The system I belong to have started producing many of them.

Funny thing is that they have acted exactly opposite that my neighbors used to do.

Because of them, crime became my new normal.

South Korea is too busy to dealing with political issues, women victims are just get silenced.

I've learned there are so many ways committing crimes to women in this world.

So many fake news and controlling made me doubt that who would pay attention to a little old victim like me.

I am so disappointed in the criminal human being I have experienced.

But I might find holy purposes to challenge them as treating like diseases.

I just can't believe that I have to spend time writing down about criminals instead I could do much more productive works.

But someplace in this world at this moment, women might get violence and tortured and varied by dog town systems.

Our world could be wonderful place.
How come they have power over innocent human beings.

My father was accidentally killed by car accident.

Their brains wired getting joy committing crimes. Their attitude was like people doing funny performances.

Groups committing crimes to a person.
